United Insurance Company is one of the top players in the insurance industry. The company's position in the industry reflects sustainability. The company has a balanced portfolio representing all segment of the insurance industry. The diversity reflects in the fact that all segments contribute to business and misc segment consists of the different business line. This has added to the strength of the company over the year. The company has strong profitability from underwriting operations, which is also a consideration. The company has a strong reinsurance panel led by Swiss Re (rated AA- by S&P), all other reinsurers are in the A category. The reinsurance coverage provides strength to risk absorption. The CAR of the bank has improved, though it is less than the regulatory benchmark for which management has to plan to recoup. The liquidity of the company without considering APNA BANK investment is lower but taking into account the performance of APNA Bank we can drive comfort from the total investment book. The management also plans to generate liquidity through divestment of some stake from its investment book. The management is committed to achieving higher benchmarks in transparency and control environment as the detailed system review is underway.

The ratings are dependent upon the envisaged plan of sustaining its relative positioning and its control environment. Continued generation of internal capital and enhancement of liquidity is considered essential. Meanwhile, all governance standards must be upheld.
