Rating Rationale and Key Rating Drivers

The ratings reflect ABPL's association with AlBaraka Banking Group – a strong Middle Eastern banking institution. ABPL witnessed improvement in net spread on account of increasing interest rate environment and enhanced contribution of CASA. A sizeable book of GoP securities in the investment portfolio helped in maintaining adequate liquidity. Going forward, the management aims low cost deposit mix and cautious credit growth, in turn, better profits. Success in planned initiatives is crucial.

Effective implementation of business strategy, particularly in the back drop of challenging operating environment and competitive banking landscape, is important. Pivotal to this strategy is achieving profitability and hence generation of internal capital. As at Sep-18, overall CAR of the Bank is reported at 10.03% which is below the regulatory requirement, and to address this sponsors are willing to inject \$10mln as ADT-I. This is expected to provide breathing space to the Bank. Moreover, improving diversification in revenue streams, particularly from non-fund based avenues and maintaining healthy asset quality are important for bottom-line performance.

Profile

Structure Al Baraka Bank (Pakistan) Limited (ABPL), incorporated as a public limited company, commenced operations as a Scheduled Commercial Bank in 2010.
Background AlBaraka Islamic Bank B.S.C (c) (ABIB), through its Pakistan branches started its operations in Pakistan in 1991. However, after acquisition of ~50% shares of Emirates Global Islamic Bank Limited (EGIBL) by ABIB, Pakistan Branches of ABIB were merged with and into EGIBL during October 2010 to form ABPL.
Operations The Bank, with its head office in Karachi, operates with a network of 188 branches as at end-Sep18.

Ownership

Ownership Structure Major shareholders of ABPL are ABIB (~59%), Islamic Corporation for the development of the Private Sector (ICD) (12%), Mal Al Khaleej group (~12%), Sheikh Tariq Bin Faisal Khalid Al Qassem (~8%) and Mr. Muhammad Umar Ijaz (3%)
Stability AlBaraka Islamic Bank B.S.C (c) (ABIB) – a 91% owned subsidiary of AlBaraka Banking Group (ABG), is a member of Dallah AlBaraka Group (DBG). DBG – a Saudi-based conglomerate - is one of the leading privately owned enterprises in the Middle East.
Business Acumen ABG has a wide geographical presence in the form of subsidiary banking units and representative offices in 16 countries. The Group provides ABPL with international expertise and strategic direction through its presence on the Board.
Financial Strength DBG has business interests in wide array of industries in Middle East including real estate, transportation, healthcare, media, and food industry, etc. ABIB, a subsidiary of DBG, is continuing to provide support and expertise to the Bank.

Governance

Board Structure Overall control of the Bank vests in the ten-member Board of Directors (BoD). Five of the board members are ABG nominees including the CEO, one is from ICD, whereas the other four are independent members.
Members' Profile Mr Adnan Ahmed Yousif – CEO ABG – is the Chairman of the board. The current CEO, Mr. Ahmed Shuja Kidwai is a professional banker with many decades of experience. He has been associated with AlBaraka Group since the start of the bank's branch operations in Pakistan. Most of the members are seasoned bankers and are also nominated on boards of respective groups' companies.
Board Effectiveness During the year, six board meetings were held. Attendance of board members in these meetings remained adequate. There are five board committees in place which help the board in effective oversight of the Bank's overall operations on relevant matters.
Financial Transparency The audit committee reports directly to the board. EY Ford Rhodes Chartered Accountants are the external auditors of the bank who expressed an unqualified opinion on the bank's financial statements for the year ended Dec 31, 2017.

Management

Organizational Structure The bank has a well-defined organizational structure in place, incorporating redundancy planning. All the revenue segments report to the Chief Operating Officer while the service segments report to the Chief Executive Officer.
Management Team The CEO, Mr. Ahmed Shuja Kidwai, is a seasoned banker with rich banking experience. He is supported by a team of experienced professionals.
Effectiveness The bank has formed, besides the shariah committee, nine committees at the management level for effective and smooth functioning of each business segment.
MIS ABPL has implemented a state of the art ERP system, as its core banking software in all conventional branches. A disaster recovery site is in place to ensure uninterrupted banking operations in the event of disaster.
Risk Management Framework The bank has established risk management systems, considering the growth targets of the bank. The management has designed a risk management manual, policies and risk appetite statement. Moreover, efforts are underway to build a strong risk management framework, to be monitored on an on-going basis by its risk management department. The board's risk management committee is responsible for overall oversight of design and implementation of different policies and procedures to manage multiple risks.

Business Risk

Industry Dynamics The banking industry witnessed significant expansion in the loan book. Last year and YTD (2018) both witnessed huge deployments. This is expected to slow down. New projects require gestation period and additionally crowding-out effect may take place. Rising interest rates mean profitability of the sector would take support. Yet NPLs, as a result, may also transpire. CAR is reaching the maximum requirement by December 2018 (11.9%). This will create a challenge for some of the players.
Relative Position ABPL, a small sized bank, has a customer deposit base of PKR 99bln at end-Sep18, holding 0.8% share of the industry.
Revenues Revenues For the 9MCY18, the bank's interest revenue witnessed an increase of ~12% on a YoY basis to PKR 3.1bln (9MCY17: PKR 2.7bln), on the back of volumetric growth as well as rising interest rate environment. Increase in revenue was supported by income from dealing in foreign currencies which saw a huge jump of 1.1x (9MCY18: PKR 284mln; 9MCY17: PKR 136mln) on account of prudent FX management amid depreciating PKR while in the period under review, the capital gains dipped to PKR 24mln (9MCY17: PKR 121mln).
Performance For the 9MCY18, the bank's yield on advances improved slightly with rising interest rates and stood at *8.4% compared to last years' 7.2% (*annualized). Consequently, the bank's cost of deposits also increased in this period (9MCY17: *3.4%, CY17: 2.9%). Higher volumetric growth coupled with improvement on the asset yield side overshadowed the higher cost of funds, bringing the NIMR ratio to *3.4% (CY17: 2.9%). The spread for 9MCY18 stood at 5.0% (CY17: 4.4%). The bank was able to curtail its non-markup expenses (9MCY18: PKR 3.6bln; CY17: PKR 5.0bln) bringing down the cost to total net revenue (9MCY18: ~92%, CY17: ~112%). However during the 9MCY18, although there was additional provisioning, the bank was able to lower its losses on a YoY basis as net loss clocked in at PKR 279mln (9MCY17: PKR 600mln).
Sustainability The budgeted forecasts and actual numbers of ABPL have adequate correlation. Increasing interest rate environment helped the bank in increasing its spread and earning higher profitability.

Financial Risk

Credit Risk During the 9MCY18, ABPL's gross advances registered a growth of 2.8%, mainly financed through deposits. Growth in advances was below industry average of 6%. Advances-to-Deposits ratio decreased slightly, as there has been pressure on CAR, coming down to 70% at end-Sep18 (end-Dec17: 72%).
Market Risk ABPL's investment portfolio comprises ~21% of total earning assets. At end-Sep18, investments stood at PKR 21.3bln, registering ~10% increase for the period. The investment portfolio remained dominated in government securities (~53%).
Liquidity And Funding ABPL's customer deposit base stood at PKR 99bln at end-Sep18, thereby registering ~6% growth during the year. The top 20 depositors' concentration has slightly increased in the recent years (end-Dec17: 19%; end-Dec16: 18%). The liquidity of the bank measured in terms of Liquid Assets / Deposits and Borrowings remained low at 33% (CY17: 31%) as compared to A category banks with an increase during the period.
Capitalization ABPL's capitalization stood at 10.03% at end-Sep18 (end-Dec17: 10.17%, end-Dec16: 10.30%), which is below the regulatory requirement. In order to meet the increasing regulatory requirement of CAR, ABG is willing to inject \$10mln, modality of which is in approval stage. This injection of ADT1 would somewhat relieve pressure from the current CAR of 10.03 as at end-Sep18 but meeting further SBP requirements of minimum 12.5% till end-Dec19 with constrained bottom-line would become increasingly difficult. ABPL issued an unsecured, subordinated, and listed Sukuk of PKR 2,000mln in Sep-14 to enhance cushion in capital adequacy. Profit rate is based on 6M-KIBOR plus 125bps p.a. and scheduled principal payments are payable semi-annually in arrears. AKBL retains the call option on the instrument, which may be exercised, in part or full, after five years (Aug-19) of issue, subject to SBP's approval.

DEBT INSTRUMENT RATING SCALE & DEFINITIONS

The instrument rating reflects forward-looking opinion on credit worthiness of underlying debt instrument; more specifically it covers relative ability to honor financial obligations. The primary factor being captured on the rating scale is relative likelihood of default.

LONG TERM RATINGS		SHORT TERM RATINGS	
AAA	Highest credit quality. Lowest expectation of credit risk. Indicate exceptionally strong capacity for timely payment of financial commitments.		
AA+ AA AA-	Very high credit quality. Very low expectation of credit risk. Indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.	A1+:	The highest capacity for timely repayment.
A+ A A-	High credit quality. Low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be vulnerable to changes in circumstances or in economic conditions.	A1:	A strong capacity for timely repayment.
BBB+ BBB BBB-	Good credit quality. Currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity.	A2:	A satisfactory capacity for timely repayment. This may be susceptible to adverse changes in business, economic, or financial conditions.
BB+ BB BB-	Moderate risk. Possibility of credit risk developing. There is a possibility of credit risk developing, particularly as a result of adverse economic or business changes over time; however, business or financial alternatives may be available to allow financial commitments to be met.	A3:	An adequate capacity for timely repayment. Such capacity is susceptible to adverse changes in business, economic, or financial conditions.
B+ B B-	High credit risk. A limited margin of safety remains against credit risk. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.	B:	The capacity for timely repayment is more susceptible to adverse changes in business, economic, or financial conditions.
CCC CC C	Very high credit risk. Substantial credit risk “CCC” Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. “CC” Rating indicates that default of some kind appears probable. “C” Ratings signal imminent default.	C:	An inadequate capacity to ensure timely repayment.
D	Obligations are currently in default.		
Outlook (Stable, Positive, Negative, Developing) Indicates the potential and direction of a rating over the intermediate term in response to trends in economic and/or fundamental business/financial conditions. It is not necessarily a precursor to a rating change. ‘Stable’ outlook means a rating is not likely to change. ‘Positive’ means it may be raised. ‘Negative’ means it may be lowered. Where the trends have conflicting elements, the outlook may be described as ‘Developing’.		Rating Watch Alerts to the possibility of a rating change subsequent to, or in anticipation of, a) some material identifiable event and/or b) deviation from expected trend. But it does not mean that a rating change is inevitable. A watch should be resolved within foreseeable future, but may continue if underlying circumstances are not settled. Rating Watch may accompany Outlook of the respective opinion.	
		Suspension It is not possible to update an opinion due to lack of requisite information. Opinion should be resumed in foreseeable future. However, if this does not happen within six (6) months, the rating should be considered withdrawn.	
		Withdrawn A rating is withdrawn on a) termination of rating mandate, b) the debt instrument is redeemed, c) the rating remains suspended for six months, d) the entity/issuer defaults., or/and e) PACRA finds it impractical to surveil the opinion due to lack of requisite information	

Disclaimer: PACRA's ratings are an assessment of the credit standing of an entity/issue in Pakistan. They do not take into account the potential transfer / convertibility risk that may exist for foreign currency creditors. PACRA's opinion is not a recommendation to purchase, sell or hold a security, in as much as it does not comment on the security's market price or suitability for a particular investor.
