#### Rating Rationale and Key Rating Drivers

The ratings recognize Ghani Chemical Industries Limited's (GCIL) leading and prominent position in the industrial and medical gases sector in terms of production capacity. The industry largely possesses an oligopolistic structure, benefiting the players. The demand for medical gases in health sector has now stabilized as the Covid-19 pandemic is eased off. On the other side, the large-scale manufacturing index comprehended recovery which led to improved demand for industrial gases. The board of directors of GCIL has decided to merge G3 Technologies Limited (formerly Service Fabric Limited) with/into GCIL for ultimate PSX listing which is a positive sign and will add comfort to the assigned ratings. During 9MFY21 the top-line of the Company showed ~10% growth and margins also showed improvement at all levels. All three plants remained operational at optimum capacity utilization. GCIL's fourth 105TPD dedicated plant became operational and started to cater to the demand of renowned industrial customer and would play a pivotal role in top-line and bottom-line growth. GCIL also intends to set up the largest 275TPD plant in KPK in the future as well. Going forward the Company is expected to receive benefits from (a) rising demand from the industrial segment which will be translated into better financial performance (b) Capacity expansions with a new plant with sustained existing capacity utilization (c) reduce reliance on borrowings from financial institutions with rationalized leveraging policy (d) stock exchange listing to capitalize future growth.

The ratings are dependent on the Company's ability to effectively utilize enhanced capacities. At the same time, management of financial risk, particularly debt coverages, remains important, wherein any further deterioration would have negative implications for the ratings. Consistent growth in market share and improved margins would support ratings.

It is not necessarily a precursor to a rating change. ‘Stable’ outlook means a rating is not likely to change. ‘Positive’ means it may be raised. ‘Negative’ means it may be lowered. Where the trends have conflicting elements, the outlook may be described as ‘Developing’.

**Rating Watch** Alerts to the possibility of a rating change subsequent to, or, in anticipation of some material identifiable event with indeterminable rating implications. But it does not mean that a rating change is inevitable. A watch should be resolved within foreseeable future, but may continue if underlying circumstances are not settled. Rating watch may accompany rating outlook of the respective opinion.

**Suspension** It is not possible to update an opinion due to lack of requisite information. Opinion should be resumed in foreseeable future. However, if this does not happen within six (6) months, the rating should be considered withdrawn.

**Withdrawn** A rating is withdrawn on a) termination of rating mandate, b) the debt instrument is redeemed, c) the rating remains suspended for six months, d) the entity/issuer defaults., or/and e) PACRA finds it impractical to surveil the opinion due to lack of requisite information.

**Harmonization** A change in rating due to revision in applicable methodology or underlying scale.

**Surveillance.** Surveillance on a publicly disseminated rating opinion is carried out on an ongoing basis till it is formally suspended or withdrawn. A comprehensive surveillance of rating opinion is carried out at least once every six months. However, a rating opinion may be reviewed in the intervening period if it is necessitated by any material happening.
