Rating Rationale and Key Rating Drivers

SME Leasing Limited is a non-deposit taking leasing Company and is majorly owned by SME Bank Limited. SME Leasing maintains a weak business and financial profile given the higher quantum of a non-performing portfolio, continuously depleting equity base, now almost eroded, due to business losses, inadequate funding profile and low liquidity. The equity has gone below the Minimum Capital Requirement. The management has been trying to boost the profitability to bring sustainability to SME Leasing but funding constraint remained a major obstacle in converting the Company into a profit-making institute. After the unfortunate demise of Mr. Abdul Waseem in May 2020, Mr. Asghar Maqsood has been diligently working as the acting CEO since July 2020. Low funding base, currently limited to a financing facility provided by the parent bank – SME Bank, is a key constraint in improvement in business profile. SME Bank itself is since long in the process of privatization. However, the management is in discussions with relevant stakeholders to explore options to increase the funding base and/or lower its finance cost by conversion of an existing facility to preference shares. Upon availability of required funding, the company expects a turnaround in performance, enabling the company to generate profits, with a build-up of good quality asset book. However, a materialization of these efforts is yet to be seen. Further, enhancement in equity levels are drastically required.

The company's efforts to curtail the operational losses are important to continue. Meanwhile, improvement in asset quality is crucial. Fresh injection of funds would be required to strengthen the company's business profile; this would also have a positive implication on the ratings. However, any material deterioration in existing risk profile of the company would negatively impact the ratings.

Profile

Structure SME Leasing Limited is a Non-Banking Financial Institution which is listed on the Pakistan Stock Exchange in 2006 with trading symbol of SLL.

Background SME Leasing Limited (SLL) was incorporated in 2002 as a result of demerger of the leasing division of SME bank and a subsidiary company of SME Bank Limited. In July 2016, subsequent to management's decision to continue as a non-deposit taking company, SLL had a license from SECP to carry out leasing business.

Operations With a network comprising of a main office in Karachi and 5 branches situated in 5 cities across Pakistan, SME Leasing Limited is engaged in facilitating the small and medium size businessman, traders, professionals, and educationists to advise & support their financial needs (loans and finance lease). The company is exercising a very cautious approach in its business with the objective of minimizing the risk of default. The company has also been managing its expenses in order to curtail its losses to the minimum possible. The core objective of the company is to extend lease and working capital financing facilities to small and medium enterprises of the country.

Ownership

Ownership Structure SLL is majorly held by SME Bank, which constitutes 73.14% shareholding. Remaining shareholding is distributed among financial Institutions (7.57%), the general public (14.24%), and insurance & other companies, corporate bodies, trust and etc. (4.88%).

Stability SLL is primarily dependent on the running finance facility of the SME Bank Limited although the bank itself is in a dire condition and incurring losses since 2009. The respective factors indicate the existence of a material uncertainty that may cast significant doubt on the company's ability to continue as a going concern. The GOP decided to privatize the bank and due diligence exercise was conducted. There has been progress since then in this regard and they are confident to complete this procedure at the earliest.

Business Acumen The Federal Government through the Ministry of Finance occupies a ~94% stake in the parent company (SME Bank), therefore the sponsor's business acumen is considered good.

Financial Strength SLL is owned by SME Bank Limited and the Govt. of Pakistan is the major shareholder of the bank. Bank has an asset base of PKR 9.9bln as of Sep20 and equity of PKR (3)bln.

Governance

Board Structure The Board of Directors (BOD) comprises six members, including the Chief Executive Officer. It constitutes three nominees of SMEBL. The remaining members are independent directors.

Members' Profile Mr. Asghar Maqsood assumed the charge of acting CEO in July 2020 after the sad demise of previously acting CEO Mr. Abdul Waseem in late May 2020.

Board Effectiveness The board has made three committees namely Audit Committee, Risk Management Committee and Human Resource & Remuneration Committee which are chaired by independent/non-executive directors and minutes of the meetings are documented. The performance of the board was evaluated as required under the regulations and effectively plays its oversight function through the various meetings held during the year.

Financial Transparency The external auditors of the company Grant Thornton Anjum Rahman, Chartered Accountants issued a clean Review of the interim financial statements as at September 30, 2020. Two emphasis of matter points were noted in the report pertaining to the equity being below MCR at 9MFY20 and the on-going process of license renewal for leasing company with SECP.

Management

Organizational Structure SLL has a distinct organizational structure. There are five key departments wherein a clear line of responsibility is defined for each cadre.

Management Team There are currently two management committees in place, namely i) Credit Committee, ii) Waiver Committee. Credit Committee deals with disbursement and the waiver committee deals with recoveries and write-offs of loans.

Effectiveness The function of the management committees is clear and well defined to adequately accomplish the goals and objectives set out by the board and higher management. Further, it oversees to ensure that an appropriately designed internal control framework is in place and routinely tested to address top risks.

MIS SLL lends mainly to the corporate & SME segment. This requires in-depth credit evaluation and effective monitoring as most of the small corporates and SMEs lack extensive control system. The absence of publicly available information makes the credit evaluation process more challenging.

Risk Management Framework The Board of Directors is responsible for establishing and monitoring risk management framework. Various sub-committees of the Board and management are involved in ensuring effective implementation of the risk management policies. The company regularly undergoes a process of continuously assessing and revising its risk management policies in line with changing market dynamics. The Committee reports regularly to the Board of Directors on its activities.

Business Risk

Industry Dynamics The business environment in Pakistan remained challenging amidst COVID-19. Post-lockdown, the economy has revived as a result of growing appetite, particularly in corporate sector. Automobile sector has shown unprecedented growth; disbursements in vehicles have augmented due to the low interest rate regime.

Relative Position SLL is ranked in the top 5 leasing companies on the basis of Assets and Equity. SLL's performance during the year continued to be weak due to the economic situation and stiff competition from other Islamic non-banking financial institutions.

Revenues The gross revenue from operations diluted (9MCY20: PKR 13.7mln; 9MCY19: PKR 20.1mln) due to the stagnant economic activities and higher policy rate. During the period 9MCY20, limited availability of funds adversely affected the writing of new business. The management has remained focused on recovery from its portfolio. Therefore, the quantum of loss further increased to PKR 33.7mln (9MCY19: Loss PKR 21.5mln).

Performance Asset quality indicators remained stressed with the majority of the portfolio being classified. On account of higher operating cost and continuous provisioning, SLL has been incurring losses since 2009. During 9MCY20, though SLL managed to have provisioning reversals owing to recoveries, however, significant operating expenses continued to remain a drag on the company's performance.

Sustainability Going forward, SLL intends to focus on its strategy of recoveries from its portfolio and writing new good quality leases with the target of minimum default. Due to a cautious approach and limited availability of funds adversely affected the writing of new quality business. Meanwhile, the privatization of SME Bank will remain important.

Financial Risk

Credit Risk SLL's struggling to manage credit risk and its concentration through diversification of activities to avoid undue concentration of risk with corporations and specific industry segments. As at end-Jun20 Plant & Machinery share in total portfolio was the largest (~55%) followed by commercial vehicles (~19%) and others (~25%). In terms of sectoral distribution, SLL is diversified as Public Transport Vehicles leads the way by standing at 14%, Printing and Packaging 10%, while others hold with 76% share.

Market Risk SLL is focusing on core financing business and has no exposure to equity/debt investment. Consequently, SLL is exposed to interest rate and other price risk only.

Liquidity And Funding In CY13 SECP disallowed SLL to raise funds by issuing certificates of deposits mainly due to non-compliance with minimum equity requirements. Since then, the main source of funding is dependent on the running finance facility granted by the holding company. The funding line availed from holding company/parent bank amounts to PKR 150mln. The revised Prudential Regulation of SBP applicable from June 2015 has restricted the exposure of the bank to a related party to the extent of 7.5% of its equity.

Capitalization Due to continuous loss and a sustained number of high non-performing loans, leases and finances SLL's equity is eroding though at a slower rate lately. Resultantly it has a highly leveraged capital structure 9MCY20: 4.2x (6MCY20: 3.4x, CY19: 2.3x, CY18: 1.5x).

Credit Rating

Credit rating reflects forward-looking opinion on credit worthiness of underlying entity or instrument; more specifically it covers relative ability to honor financial obligations. The primary factor being captured on the rating scale is relative likelihood of default.

Scale	Long-term Rating Definition
AAA	Highest credit quality. Lowest expectation of credit risk. Indicate exceptionally strong capacity for timely payment of financial commitments
AA+	
AA	Very high credit quality. Very low expectation of credit risk. Indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.
AA-	
A+	
A	High credit quality. Low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be vulnerable to changes in circumstances or in economic conditions.
A-	
BBB+	
BBB	Good credit quality. Currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity.
BBB-	
BB+	Moderate risk. Possibility of credit risk developing. There is a possibility of credit risk developing, particularly as a result of adverse economic or business changes over time; however, business or financial alternatives may be available to allow financial commitments to be met.
BB	
BB-	
B+	
B	High credit risk. A limited margin of safety remains against credit risk. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.
B-	
CCC	
CC	Very high credit risk. Substantial credit risk “CCC” Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. “CC” Rating indicates that default of some kind appears probable. “C” Ratings signal imminent default.
C	
D	Obligations are currently in default.

Scale	Short-term Rating Definition
A1+	The highest capacity for timely repayment.
A1	A strong capacity for timely repayment.
A2	A satisfactory capacity for timely repayment. This may be susceptible to adverse changes in business, economic, or financial conditions.
A3	An adequate capacity for timely repayment. Such capacity is susceptible to adverse changes in business, economic, or financial conditions.
A4	The capacity for timely repayment is more susceptible to adverse changes in business, economic, or financial conditions. Liquidity may not be sufficient.

Outlook (Stable, Positive, Negative, Developing) Indicates the potential and direction of a rating over the intermediate term in response to trends in economic and/or fundamental business/financial conditions. It is not necessarily a precursor to a rating change. ‘Stable’ outlook means a rating is not likely to change. ‘Positive’ means it may be raised. ‘Negative’ means it may be lowered. Where the trends have conflicting elements, the outlook may be described as ‘Developing’.

Rating Watch Alerts to the possibility of a rating change subsequent to, or, in anticipation of some material identifiable event with indeterminable rating implications. But it does not mean that a rating change is inevitable. A watch should be resolved within foreseeable future, but may continue if underlying circumstances are not settled. Rating watch may accompany rating outlook of the respective opinion.

Suspension It is not possible to update an opinion due to lack of requisite information. Opinion should be resumed in foreseeable future. However, if this does not happen within six (6) months, the rating should be considered withdrawn.

Withdrawn A rating is withdrawn on a) termination of rating mandate, b) the debt instrument is redeemed, c) the rating remains suspended for six months, d) the entity/issuer defaults., or/and e) PACRA finds it impractical to surveil the opinion due to lack of requisite information.

Harmonization A change in rating due to revision in applicable methodology or underlying scale.

Surveillance. Surveillance on a publicly disseminated rating opinion is carried out on an ongoing basis till it is formally suspended or withdrawn. A comprehensive surveillance of rating opinion is carried out at least once every six months. However, a rating opinion may be reviewed in the intervening period if it is necessitated by any material happening.
