Rating Rationale and Key Rating Drivers

The Water and Power Development Authority of Pakistan (WAPDA) is in the process of the construction of the DASU hydropower project (Dasu). Dasu, once completed would become the second-largest hydel project in Pakistan. Dasu stage 1 (2,160 MW) is expected to complete by 2023 with a cost of PKR 510.980bln (USD ~3.179bln). For partial financing of the project, WAPDA is issuing debt instruments worth PKR 88bln (TFCs: 35.2bln, Sukuks: 52.8bln) in multiple tranches. For this purpose in May 2017 first tranche of debt instruments has been issued and WAPDA is planning to issue a second tranche in early 2021.

The ratings of PPTFCs (Tranche 1: PKR 10bln, Tranche 2: PKR 4.235bln) and Sukuks (Tranche 1: PKR 15bln, Tranche 2: PKR 6.353bln) reflects an unconditional and irrevocable guarantee by the Government of Pakistan (GoP). The guarantee covers the payment of the total outstanding amount of the instruments and related profit components. GoP would pay the entire called amount immediately upon receiving a demand notice from the trustee. Additionally, WAPDA is maintaining a debt payment account (DPA) under the exclusive lien of the trustee. Within the first fifteen days of each month, WAPDA deposits an amount equal to 1/6th of the upcoming installment in the DPA. The rating apart from a debt payment and guarantee mechanism recognizes WAPDA's strategic importance as the major hydroelectric power supplier to the country. WAPDA generated 32,295GWh electricity in FY20. WAPDA expects to generate an additional ~8,070MW by the completion of new hydel projects in the next four years.

WAPDA's financial profile draws comfort from strong cash flows. However, it remains dependent on the repayment behavior of the power purchaser. Continued compliance with the predefined covenants of PPTFC, including maintenance of DPA would remain critical. The watch captures that the financial statements of the issuer for FY20 are being audited and will be approved in the coming month. This will be followed by the process for the approval of financial statements for the ongoing financial year.

Rating Watch Alerts to the possibility of a rating change subsequent to, or, in anticipation of some material identifiable event with indeterminable rating implications. But it does not mean that a rating change is inevitable. A watch should be resolved within foreseeable future, but may continue if underlying circumstances are not settled. Rating watch may accompany rating outlook of the respective opinion.

Suspension It is not possible to update an opinion due to lack of requisite information. Opinion should be resumed in foreseeable future. However, if this does not happen within six (6) months, the rating should be considered withdrawn.

Withdrawn A rating is withdrawn on a) termination of rating mandate, b) the debt instrument is redeemed, c) the rating remains suspended for six months, d) the entity/issuer defaults., or/and e) PACRA finds it impractical to surveill the opinion due to lack of requisite information.

Harmonization A change in rating due to revision in applicable methodology or underlying scale.

Surveillance. Surveillance on a publicly disseminated rating opinion on debt instrument is carried out on an ongoing basis till the maturity of the instrument or cessation of contract. A comprehensive surveillance of rating opinion is carried out at least once every six months. However, a rating opinion may be reviewed in the intervening period if it is necessitated by any material happening.
