Rating Rationale and Key Rating Drivers

The ratings reflect the strength of ownership structure of the company: Engro Eximp is a wholly owned subsidiary of Engro Corp, the parent company and one of the largest conglomerate in Pakistan (rated AA+ by PACRA). The CEO of Engro Corp is also the Chairman of Engro Eximp. Ratings take comfort from the strong corporate governance framework of the group. Company's revenue continue to hold its position after successfully achieving its break even in CY18. Profits have sustained since then, after suffering from huge losses in the past. As rice industry struggles with stiff competition in the international market, mainly with India, due to lack of Govt. support - basmati exports from Pakistan remained below its potential mark. Moreover, since Thailand has been competing in the international market with its premium rice variety, which could have an impact on Pakistani rice - including basmati - in near future. Rupee devaluation came in favorable, as dealing in a product – 'basmati' - a high priced commodity assisted the company in improving its revenues. The financial risk profile has also recovered adequately while slightly dwindling due to high end debt profile.

The ratings are dependent upon growth in business volume and redemption of profits. Adherence to sound financial discipline while strengthening debt servicing capacity through improved cash position is vital for the ratings. Positive outcome of the future projects and sustainability of profits remain a catalyst for the business

Business Risk

Industry Dynamics Pakistan's Rice industry is an instrumentalist segment in the overall economy as it is one of the five major crops of the country and a contributor to the national exports revenue. After wheat, it is Pakistan's second main staple food crop. Major factors affecting rice production include water availability, area of cultivation, crop yield and the governing policies and initiatives. During FY19, rice crop area decreased by ~3.1% to 2.8 million hectares compared to last year. The production stood at 7.2 million tonnes as against 7.5 million tonnes last year, short by ~3.3%, mainly due to decrease in area cultivated, dry weather and shortage of water. The maximum contribution from the rice sector in country's foreign exchequer is from non-basmati rice exports, as basmati rice is locally consumed and minimal quantity is exported.

Relative Position The past couple of years have been difficult for Engro Eximp as it was recovering from the after effects of over trading. CY18 brought fortune for the business as it returned to stability. The business is still in the initial growth phase, therefore market share is relatively very small (less than ~5%) with a capacity of 24 tons/hour.

Revenues The Company has successfully regained its business position which it originally had. In the Year CY16 and CY17, when the company scaled up its operations. In CY18, the company achieved a total husking of 34,540 tons of paddy (CY17: 19,978 tons) and processed 21,430 tons of rice (CY17: 25,263 tons). Company's ~94% of the rice exports are to the European Markets, having an edge of selling high priced basmati rice. In CY18, topline clocked in at PKR~2.5bln which is an increase of ~45% YoY, while for 1HCY19 it stood at PKR~1.7bln (1HCY18: 1.6bln) and exported 20K tons of rice. The company is expected to surpass the PKR~3bln mark in the going year.

Margins The company managed to regain its profitability margins, at gross level, in CY18 (~10.6%) and continue to sustain it in 1HCY19 (~9.5%), after enduring losses for three consecutive years. Engro Eximp closed its year CY18 on a higher note: net profit of PKR~333mln which was largely contributed by the reversal of impairment (PKR ~314mln), subsequently, the net profit for 1HCY19 stood at PKR ~11mln. Previously, the company suffered losses, as the business fundamentals were being scaled, Sustainable profit yield is pivotal for the company.

Sustainability As the business turned around to stable financial results in CY18, it is now expected to explore new business attributes. The company plans on exporting non-basmati rice as part of its pilot project which is expected to generate inflows of PKR~55mln. With an idea of diversification, the company also plans to test export trade of fruits.

Financial Risk

Working Capital Working capital needs are derived from receivables and inventory days. Cash conversion cycle is linked to the rice seasonality element. In 1HCY19 net working capital days stood at 176 days (CY18: ~224 days). The increase is because of elevated inventory levels, as the company has formally resumed its business. Funding needs are mainly fulfilled through short term borrowings: 1HCY19: PKR~1,884mln, (CY18: PKR~1,873mln, CY17: PKR~1,612mln) and an uptick is perceived for the same in near future as the company continues to grow.

Coverages The return of profits enabled the company to produce positive FCFO of PKR 104mln in 1HCY19 (CY18: PKR~250mln) as against previous years of negative FCFO (CY17: PKR -210mln, CY16: PKR -353mln). As a result, coverages observed a sign of relief (Interest coverage: 1HCY19: ~1x, CY18: ~2.3x, CY17: (3.7x).

Capitalization Engro Eximp's capital structure is dominated by short term borrowing and equity. The Company obtained a long term loan, for the first time in three years, of PKR 80mln to finance the installation of solar plant. The company's debt to equity ratio remained on a relatively higher end: 1HCY19: ~63% (CY18: 62%, CY17:~66%) as the company's equity is undermined due to previous years loss adjustments.

Credit Rating Scale & Definitions

Credit rating reflects forward-looking opinion on credit worthiness of underlying entity or instrument; more specifically it covers relative ability to honor financial obligations. The primary factor being captured on the rating scale is relative likelihood of default.

Long Term Ratings		Short Term Ratings	
AAA	Highest credit quality. Lowest expectation of credit risk. Indicate exceptionally strong capacity for timely payment of financial commitments	A1+	The highest capacity for timely repayment.
AA+ AA AA-	Very high credit quality. Very low expectation of credit risk. Indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.	A1	A strong capacity for timely repayment.
A+ A A-	High credit quality. Low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be vulnerable to changes in circumstances or in economic conditions.	A2	A satisfactory capacity for timely repayment. This may be susceptible to adverse changes in business, economic, or financial conditions.
BBB+ BBB BBB-	Good credit quality. Currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity.	A3	An adequate capacity for timely repayment. Such capacity is susceptible to adverse changes in business, economic, or financial conditions.
BB+ BB BB-	Moderate risk. Possibility of credit risk developing. There is a possibility of credit risk developing, particularly as a result of adverse economic or business changes over time; however, business or financial alternatives may be available to allow financial commitments to be met.	B	The capacity for timely repayment is more susceptible to adverse changes in business, economic, or financial conditions.
B+ B B-	High credit risk. A limited margin of safety remains against credit risk. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.	C	An inadequate capacity to ensure timely repayment.
CCC CC C	Very high credit risk. Substantial credit risk “CCC” Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. “CC” Rating indicates that default of some kind appears probable. “C” Ratings signal imminent default.		
D	Obligations are currently in default.		

Outlook (Stable, Positive, Negative, Developing) Indicates the potential and direction of a rating over the intermediate term in response to trends in economic and/or fundamental business/financial conditions. It is not necessarily a precursor to a rating change. ‘Stable’ outlook means a rating is not likely to change. ‘Positive’ means it may be raised. ‘Negative’ means it may be lowered. Where the trends have conflicting elements, the outlook may be described as ‘Developing’.

Rating Watch Alerts to the possibility of a rating change subsequent to, or in anticipation of, a) some material identifiable event and/or b) deviation from expected trend. But it does not mean that a rating change is inevitable. A watch should be resolved within foreseeable future, but may continue if underlying circumstances are not settled. Rating Watch may accompany Outlook of the respective opinion.

Suspension It is not possible to update an opinion due to lack of requisite information. Opinion should be resumed in foreseeable future. However, if this does not happen within six (6) months, the rating should be considered withdrawn.

Withdrawn A rating is withdrawn on a) termination of rating mandate, b) cessation of underlying entity, c) the debt instrument is redeemed, d) the rating remains suspended for six months, e) the entity/issuer defaults, or/and f) PACRA finds it impractical to surveil the opinion due to lack of requisite information.

Harmonization A change in rating due to revision in applicable methodology or underlying scale.
