#### Rating Rationale and Key Rating Drivers

DG Khan Cement's ratings reflect the company's strong position in the cement industry emanating from its one of the largest market share of ~10.2% in terms of installed production capacity. The Cement sector's dispatches have recorded splendid growth and surged by 21% in FY21 as demand in the domestic market accelerated. Furthermore, the quarterly results for 1QFY22 showed that local dispatches registered modest growth of 0.5 million tons (4%) to 11 million tons QOQ. The industry's future demand outlook is positive, in view of the infrastructure projects in the pipeline. Export is another avenue. Industry-wide exports have gone up as a new export window is created. The Company through its HUB plant also reported a 7.66% increase in export dispatches to countries including Sri Lanka, Afghanistan, Bangladesh and China. The Company's revenues witnessed an increase (1QFY22: PKR 11.15bln, FY21: PKR 45bln, FY20: PKR 38bln) attributed to an uptick in sales volumes, positive price indicators and, reinvigorating economy. The decrease in finance cost and the dividend income from its investment book – mainly MCB Bank Limited further added positively to the company's bottom-line during the year. However, with rising interest rates the finance cost is expected to increase leading to the reversal of the impact of lower finance cost in FY21. Margins in 1QFY22 also improved and Company managed to recoup previous losses and reported profits of PKR 908mln in 1QFY22 (FY21: PKR 3.721bln, FY20: loss of PKR 2.159bln). With recently installed WHR plant at HUB site and fully operational CFPP plant, cost efficiency in energy cost will be expected in upcoming quarters of FY22. The Company's leveraging is currently at an adequate level, especially with the repayments being made. The company is exploring different options for the capacity expansions however no such plans have been finalized yet.

The rating takes into account the association company with Nishat Group and remain dependent on upholding company's market position along with sustenance of business volumes, margins and achieving optimal utilization of production capacities. Going forward, sustainability in profits for timely repayment of debt remains vital.

**Credit Rating**

Credit rating reflects forward-looking opinion on credit worthiness of underlying entity or instrument; more specifically it covers relative ability to honor financial obligations. The primary factor being captured on the rating scale is relative likelihood of default.

Scale	Long-term Rating Definition
AAA	<b>Highest credit quality.</b> Lowest expectation of credit risk. Indicate exceptionally strong capacity for timely payment of financial commitments
AA+	
AA	<b>Very high credit quality.</b> Very low expectation of credit risk. Indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.
AA-	
A+	
A	<b>High credit quality.</b> Low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be vulnerable to changes in circumstances or in economic conditions.
A-	
BBB+	
BBB	<b>Good credit quality.</b> Currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity.
BBB-	
BB+	<b>Moderate risk.</b> Possibility of credit risk developing. There is a possibility of credit risk developing, particularly as a result of adverse economic or business changes over time; however, business or financial alternatives may be available to allow financial commitments to be met.
BB	
BB-	
B+	
B	<b>High credit risk.</b> A limited margin of safety remains against credit risk. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.
B-	
CCC	<b>Very high credit risk.</b> Substantial credit risk “CCC” Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. “CC” Rating indicates that default of some kind appears probable. “C” Ratings signal imminent default.

A3	An adequate capacity for timely repayment. Such capacity is susceptible to adverse changes in business, economic, or financial conditions.
A4	The capacity for timely repayment is more susceptible to adverse changes in business, economic, or financial conditions. Liquidity may not be sufficient.

*\*The correlation shown is indicative and, in certain cases, may not hold.*

**Outlook (Stable, Positive, Negative, Developing)** Indicates the potential and direction of a rating over the intermediate term in response to trends in economic and/or fundamental business/financial conditions. It is not necessarily a precursor to a rating change. ‘Stable’ outlook means a rating is not likely to change. ‘Positive’ means it may be raised. ‘Negative’ means it may be lowered. Where the trends have conflicting elements, the outlook may be described as ‘Developing’.

**Rating Watch** Alerts to the possibility of a rating change subsequent to, or, in anticipation of some material identifiable event with indeterminable rating implications. But it does not mean that a rating change is inevitable. A watch should be resolved within foreseeable future, but may continue if underlying circumstances are not settled. Rating watch may accompany rating outlook of the respective opinion.

**Suspension** It is not possible to update an opinion due to lack of requisite information. Opinion should be resumed in foreseeable future. However, if this does not happen within six (6) months, the rating should be considered withdrawn.

**Withdrawn** A rating is withdrawn on a) termination of rating mandate, b) the debt instrument is redeemed, c) the rating remains suspended for six months, d) the entity/issuer defaults., or/and e) PACRA finds it impractical to surveil the opinion due to lack of requisite information.

**Harmonization** A change in rating due to revision in applicable methodology or underlying scale.

**Surveillance.** Surveillance on a publicly disseminated rating opinion is carried out on an ongoing basis till it is formally suspended or withdrawn. A comprehensive surveillance of rating opinion is carried out at least once every six months. However, a rating opinion may be reviewed in the intervening period if it is necessitated by any material happening.
