Rating Rationale and Key Rating Drivers

Askari Cement's ratings reflect its sustained position in the cement industry. The Company has two existing cement manufacturing units (Nizampur and Wah) - operating with combined capacity of 2.7mln tpa. Over the last few years, the company has been able to maintain growth trajectory trend in revenue. During FY19, industry dynamics especially for cement players operating in north region have shifted significantly on account of diluted cement prices, increase in FED on coal import and depreciation in Pak Rupee against other currencies. However, the company's margins witnessed improvement attributable to usage of local coal and recent completion of BMR which led to operational efficiencies. Hence, the business profile is expected to behave strongly in the medium term. The financial risk profile is good with moderate leveraging and strong absolute EBITDA. Cashflows provide good coverage to anticipate repayment. Going forward, leveraging is expected to remain at comfortable level. The ratings take comfort from strong financial strength of Fauji Foundation - third largest sponsoring group in the cement industry.

The ratings are dependent on current positioning of the company's business besides financial risk profile; strengthening of equity base is essential. Any significant deterioration in the sector's outlook encompassing expected challenges of supply glut, substantial decline in local demand or deterioration in cement prices will negatively affect the ratings.

Business Risk

Industry Dynamics Cement industry is divided into North and South region – majority (76%) operational capacity exists in North region. Industry has achieved its majority capacity expansions in last two years of around 14mln tons per annum. During FY19, north region witnessed 5% and 18% decline in local and export dispatches respectively attributable to contractionary fiscal policy, slowdown in large infrastructural activities and low demand from Afghanistan and India (export avenues). South region witnessed uptrend in dispatches which is correlated with longevity of export window available through sea. Industry dynamics has changed significantly driven by unsustainable cement prices (especially in north region) on account of supply glut recently created, muted demand and rupee depreciation. Cement players witnessed significant dip in margins on account of aforementioned factors. Currently, leveraging of industry is moderate (28% as at end-Mar19) but increased interest rates has amplified the stress on financial risk profile of players. Going forward – with full utilization of lately commenced plants – industry is expected to face expanded capacity challenge. Cement prices and margins are expected to stay under stress as demand front deemed to stay weak for at least upcoming one year.

Relative Position Out of total industry's cement capacity of 59.4mln tpa (North:45.4 mln tpa, South:14.0 mln tpa). Askari Cement holds a market share of 5.9% as at June 19 witnessed slight increasing.

Credit Rating Scale & Definitions

Credit rating reflects forward-looking opinion on credit worthiness of underlying entity or instrument; more specifically it covers relative ability to honor financial obligations. The primary factor being captured on the rating scale is relative likelihood of default.

Long Term Ratings		Short Term Ratings	
AAA	Highest credit quality. Lowest expectation of credit risk. Indicate exceptionally strong capacity for timely payment of financial commitments	A1+	The highest capacity for timely repayment.
AA+ AA AA-	Very high credit quality. Very low expectation of credit risk. Indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.	A1	A strong capacity for timely repayment.
A+ A A-	High credit quality. Low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be vulnerable to changes in circumstances or in economic conditions.	A2	A satisfactory capacity for timely repayment. This may be susceptible to adverse changes in business, economic, or financial conditions.
BBB+ BBB BBB-	Good credit quality. Currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity.	A3	An adequate capacity for timely repayment. Such capacity is susceptible to adverse changes in business, economic, or financial conditions.
BB+ BB BB-	Moderate risk. Possibility of credit risk developing. There is a possibility of credit risk developing, particularly as a result of adverse economic or business changes over time; however, business or financial alternatives may be available to allow financial commitments to be met.	B	The capacity for timely repayment is more susceptible to adverse changes in business, economic, or financial conditions.
B+ B B-	High credit risk. A limited margin of safety remains against credit risk. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.	C	An inadequate capacity to ensure timely repayment.
CCC CC C	Very high credit risk. Substantial credit risk “CCC” Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. “CC” Rating indicates that default of some kind appears probable. “C” Ratings signal imminent default.		
D	Obligations are currently in default.		

Outlook (Stable, Positive, Negative, Developing) Indicates the potential and direction of a rating over the intermediate term in response to trends in economic and/or fundamental business/financial conditions. It is not necessarily a precursor to a rating change. ‘Stable’ outlook means a rating is not likely to change. ‘Positive’ means it may be raised. ‘Negative’ means it may be lowered. Where the trends have conflicting elements, the outlook may be described as ‘Developing’.

Rating Watch Alerts to the possibility of a rating change subsequent to, or in anticipation of, a) some material identifiable event and/or b) deviation from expected trend. But it does not mean that a rating change is inevitable. A watch should be resolved within foreseeable future, but may continue if underlying circumstances are not settled. Rating Watch may accompany Outlook of the respective opinion.

Suspension It is not possible to update an opinion due to lack of requisite information. Opinion should be resumed in foreseeable future. However, if this does not happen within six (6) months, the rating should be considered withdrawn.

Withdrawn A rating is withdrawn on a) termination of rating mandate, b) cessation of underlying entity, c) the debt instrument is redeemed, d) the rating remains suspended for six months, e) the entity/issuer defaults, or/and f) PACRA finds it impractical to surveil the opinion due to lack of requisite information.

Harmonization A change in rating due to revision in applicable methodology or underlying scale.
