Rating Rationale and Key Rating Drivers

The ratings reflect strong business profile of Narowal Energy Limited emanating from the demand risk coverage under Power Purchase Agreement signed between CPPA-G and the Company. Meanwhile, the Implementation Agreement provides sovereign guarantee for cash flows, given adherence to agreed performance benchmarks (Availability: 88%, Efficiency: 45%). The Company continues to meet its performance benchmarks. Nevertheless, delayed payments from the power purchaser remained a challenge as the same poses pressure on Company's working capital requirements. The ratings incorporate low operational risk, a result of in-house O&M undertaken by Hub Power Services Limited (HPSL) – an associated company. The Company's generation witnessed a decrease during FY19 on the back of lower power demand by CPPA-G. Narowal Energy has been repaying its debt repayments (Principal and Markup) on time without availing benefit of forbearance period, facet of strong financial profile and working capital management. Sound financial profile of Hubco; the holding company, provides comfort to the ratings.

Adherence to good financial discipline towards both financial and commercial obligations would remain important. Meanwhile, upholding strong operational performance in line with agreed performance levels remain important. Because of the mounting receivables and consequent funding thereof from banking lines, remaining cushion in the available working capital facilities is limited, warranting management's immediate attention. However, management is continuously working for the release of overdue amount which would result in sufficient availability of funds.

Performance Risk

Industry Dynamics Pakistan total power generation is increasing on the back of new power projects under CPEC. Going forward, cheap renewable electricity will be a challenge to viability of thermal power plants. During FY18, there has been a growth of ~30% in the actual power generation. Moreover, there has been an increase of ~18% in the installed capacity as at end-Jun18 to 32,613MW (FY17: 27,703MW).

Generation During 1QFY20 electricity generation is 197GWh, FY19: 636GWh (9MFY18: 899GWh; FY18: 1200GWh FY17: 1,334GWh). Generation was lower because of low demanded load by CPPA-G on the back of improving energy mix of the country through inclusion of coal and renewable energy based power projects.

Performance Benchmark The required availability for Narowal Energy Ltd under the PPA is 88%. During 1QFY20, average plant availability has been maintained at 95%. Revenue as at 1QFY20 is PKR 5,141mln (FY19: PKR 16,191, FY18: PKR 18,220, FY17: 4,735).

Financial Risk

Credit Rating Scale & Definitions

Credit rating reflects forward-looking opinion on credit worthiness of underlying entity or instrument; more specifically it covers relative ability to honor financial obligations. The primary factor being captured on the rating scale is relative likelihood of default.

Long Term Ratings		Short Term Ratings	
AAA	Highest credit quality. Lowest expectation of credit risk. Indicate exceptionally strong capacity for timely payment of financial commitments	A1+	The highest capacity for timely repayment.
AA+ AA AA-	Very high credit quality. Very low expectation of credit risk. Indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.	A1	A strong capacity for timely repayment.
A+ A A-	High credit quality. Low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be vulnerable to changes in circumstances or in economic conditions.	A2	A satisfactory capacity for timely repayment. This may be susceptible to adverse changes in business, economic, or financial conditions.
BBB+ BBB BBB-	Good credit quality. Currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity.	A3	An adequate capacity for timely repayment. Such capacity is susceptible to adverse changes in business, economic, or financial conditions.
BB+ BB BB-	Moderate risk. Possibility of credit risk developing. There is a possibility of credit risk developing, particularly as a result of adverse economic or business changes over time; however, business or financial alternatives may be available to allow financial commitments to be met.	B	The capacity for timely repayment is more susceptible to adverse changes in business, economic, or financial conditions.
B+ B B-	High credit risk. A limited margin of safety remains against credit risk. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.	C	An inadequate capacity to ensure timely repayment.
CCC CC C	Very high credit risk. Substantial credit risk “CCC” Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. “CC” Rating indicates that default of some kind appears probable. “C” Ratings signal imminent default.		
D	Obligations are currently in default.		

Outlook (Stable, Positive, Negative, Developing) Indicates the potential and direction of a rating over the intermediate term in response to trends in economic and/or fundamental business/financial conditions. It is not necessarily a precursor to a rating change. ‘Stable’ outlook means a rating is not likely to change. ‘Positive’ means it may be raised. ‘Negative’ means it may be lowered. Where the trends have conflicting elements, the outlook may be described as ‘Developing’.

Rating Watch Alerts to the possibility of a rating change subsequent to, or in anticipation of, a) some material identifiable event and/or b) deviation from expected trend. But it does not mean that a rating change is inevitable. A watch should be resolved within foreseeable future, but may continue if underlying circumstances are not settled. Rating Watch may accompany Outlook of the respective opinion.

Suspension It is not possible to update an opinion due to lack of requisite information. Opinion should be resumed in foreseeable future. However, if this does not happen within six (6) months, the rating should be considered withdrawn.

Withdrawn A rating is withdrawn on a) termination of rating mandate, b) cessation of underlying entity, c) the debt instrument is redeemed, d) the rating remains suspended for six months, e) the entity/issuer defaults, or/and f) PACRA finds it impractical to surveil the opinion due to lack of requisite information.

Harmonization A change in rating due to revision in applicable methodology or underlying scale.
