#### Rating Rationale and Key Rating Drivers

TPL Trakker Limited (or the "Company") is in the business of providing superior quality GPS, GSM & Satellite Mobile Asset Tracking Management, and Information Solutions. The assigned rating takes into account the Company's prominent position in Pakistan's tracking industry, emanating from its multifaceted product portfolio and sanguine technology infrastructure. As diversity becomes inevitable to sustain in its operating segment, the Company is gradually shifting toward business avenues that are more beneficial for the Company's growth. The new segments have already achieved above par results, however, incremental yet consistent cash flows remain pivotal. With a niche service area like Digital Mapping and location services, the Company is focused on innovations, partnerships, product development, and direct business development – both in B2B and B2G, to drive stable and sustainable growth for the rest of the year. The financial profile of the Company is demonstrated by stretched working capital and moderate cash flows where borrowings are a mix of short term and long term. Recently, in Apr'22 the Company has redeemed its long term Sukuk amounting PKR 600mln. While successfully made the repayments of profits and principal installment falling due on 29-Mar'22. Modest growth in revenue and reduction in loss relative to last year, signals easing of pressure on servicing of upcoming financial obligation.

The ratings are dependent upon the strength of the underlying security of the instrument. The instrument is secured through a tiered security structure. In addition to this, specific comfort to the assigned ratings is being drawn from the inclusion of a pre-default mechanism, comprising a facility payment account and facility service reserve account in which one installment will be maintained.
