#### Rating Rationale and Key Rating Drivers

The ratings reflect sustained performance metrics of the company. Amid COVID-19 Pandemic despite unfavorable circumstances company has maintained stability in its turnover as reflected in the published financial statements for FY20 as well as 1QFY21. Business risk profile draws support from growing demand for electricity and continuous improvement across various operational metrics; however, COVID-19 has resulted in various challenges, with additional directives from the Government for power companies, aimed at consumer facilitation. In FY20, the improving trajectory of T&D losses has been affected while growth in unit sent out was also lower than projected. These factors along with a significant increase in finance cost, caused a dip in net profits compared to the preceding year. However, with the economic activity revival post COVID-19 lockdown, units sent-out in Q1'FY2021 increased by 7.3% vis-à-vis corresponding period last year with K-Electric posting a net profit in Q1'FY2021. There was rationalization in the trade debts. A significant jump has been noted in the other receivables, primarily due to outstanding balances and tariff differential claims. Thus, for additional cash and to fulfill working capital requirement company is resorting to short term debt avenues. Till date K-Electric has issued a series of fourteen Islamic Commercial Papers, among these five ICPs (ICP-10, ICP-11, ICP12, ICP13 & ICP14) worth PKR 19.4bln are not yet due for redemption while the rest are redeemed timely. Furthermore, K-Electric has also issued a Sukuk bond of PKR 25bln. The company continued to add to its asset base: expansion was noted in plants, distribution and transmission. There has been increased in payable side that is mainly due to power purchase from CPPA-G/NTDC (800 MW) which as per the agreed mechanism are to be adjusted with TDC.

The performance metrics in the ongoing financial year has shown similar trends with more focus on the production and sale of power units. At the same time, upholding business and financial metrics is of utmost importance. The company has bridged its gap in regulatory timeline for the publication of financial statements.
