### **Rating Rationale and Key Rating Drivers**

Rice is among the five major crops of Pakistan and is the second maia n staple food, after wheat. The segment contributes about 3.5% in agriculture value addition and 0.7% to GDP. Local consumption includes ~95% of basmati rice and ~5% non-basmati. During FY23, rice crop area decreased to ~3.2mln Hec (FY22: ~3.4mln Hec), reflecting a decrease of ~6%. Rice production decreased by ~17%, standing at ~7.4mln MT in FY23 (FY22: ~8.9mln MT). Floods during Aug-22 razed rice crops, causing an average crop loss of ~20-25%. New higher-yielding hybrid rice varieties and improved agronomic practices are factors minimizing the production loss. Around ~4mln MT of rice is consumed locally, while, the remaining is exported. During FY23, Pakistan exports decreased to ~USD 2.1bln (FY22: ~USD 2.5bln). Thus, impacting the industry's overall topline. However, rupee depreciation provided some cushion to the export players. The industry's overall margins and cashflows may become stretched. Industry poses a developing outlook for the ongoing year.

The ratings reflect Al-Khair Rice Mills association with well-established players in the oil marketing and distribution segments, namely Gas & Oil Petroleum and Sitara Petroleum. The Group also has presence in oil logistics, organic farming, and real estate segments of the economy. Being an establishing player in terms of volume, the Company mainly generates (66%) of revenue from local Basmati sales, along with sizeable contribution (33%) from exports. Moreover, the Sponsors are further pursuing export avenues in the Middle East and European regions. To cater this, they have enhanced the rice processing capacity to 30MT/hr. Governance and management are still evolving, as the Group plans to integrate Al-Khair's systems and reporting alongside the other Group entities. Streamlined operations at group level are anticipated to be beneficial for the Company and assist in improving the relative position in the rice segment of the country. Business risk profile portrays a stability through improving topline, with modest net margins. A slight dip in profitability (FY23: PKR 81mln, FY22: PKR 95mln) resulted from low quantum of exports and high finance cost. However, the management anticipates improved financial performance emitting from growth in revenues in the subsequent years. Financial risk profile of the Company remains stable owing to moderately leveraged capital structure, consisting majorly of short-term debt, obtained for working capital management. Coverages remain stable due to better cost management.

The ratings are dependent on the management's ability to improve the revenue streams through better distribution channels. Prudent management of expansion and related debt in order to meet financial obligations will remain important. Any significant decline in coverages and/or erosion of margins may adversely impact the ratings.

### **Business Risk**

Industry Dynamics Rice is among the five major crops of Pakistan and is the second main staple food, after wheat. The segment contributes about 3.5% in agriculture value addition and 0.7% to GDP. Local consumption includes ~95% of basmati rice and ~5% non-basmati. During FY23, rice crop area decreased to ~3.2mln Hec (FY22: ~3.4mln Hec), reflecting a decrease of ~6%. Rice production decreased by ~17%, standing at ~7.4mln MT in FY23 (FY22: ~8.9mln MT). Floods during Aug-22 razed rice crops, causing an average crop loss of ~20-25%. New higher-yielding hybrid rice varieties, and improved agronomic practices are factors minimizing the production loss. Around ~4mln MT of rice is consumed locally, while, the remaining is exported. During FY23, Pakistan exports decreased to ~USD 2.1bln (FY22: ~USD 2.5bln). Thus, impacting the industry's overall topline. However, rupee depreciation provided some cushion to the export players. Industry's overall margins and cashflows may become stretched. Industry poses a developing outlook for the ongoing year

Relative Position Al-Khair's revenue is driven from sale of Basmati rice and holds a market share of less than ~1%.

Revenues The Company generates ~66% of its revenue from local sales and ~34% through export sales. Over the years, the Company's revenue stream has increased, mainly showing improvement in the local market. The Company makes local sales through a well-defined distribution channel across Punjab. During Aug-23, revenue surged and clocked at ~ PKR 4,022mln witnessing an increase of ~ 13% (Aug-22: ~ PKR 3,544mln), supported by an increase in price for Basmati rice and rupee devaluation.

Margins Al-Khair has rising profitability margins; Gross profit margin decreased to ~10.2% during Aug-23 (Aug-22: ~11.3%), due to high input cost, mainly paddy. Operating margins also followed similar trend and stood at ~9.4% in Aug-23, from ~10.5%, due to trickle-down effect. Net income recorded at ~PKR 81mln in Aug-23 (Aug-22: ~PKR 95mln), despite higher finance costs incurred. Hence, the net profit margin also reduced (Aug-23: ~2%, Aug-22: ~2.7%).

Sustainability The Company has recently increased the production capacity of its existing operations to 30MT/hr. Materialization of projected revenue growth is essential considering the competitiveness of rice market. Going forward, the Company plans to expand its footings in the export market. Moreover, in increased ERF rates, working capital management remains pivotal.

### Financial Risk

Working Capital Working capital needs are derived from receivables and inventory days while the cash conversion cycle is linked to rice seasonality. Net working capital days improved as of Aug-23 to 97 days (Aug-22: 104 days) due to higher stock offtake led to limited inventory days (Aug-23: 51 days, Aug-22: 66 days). Receivable days stood at (Aug-23: 52 days, Aug-22: 49 days). Furthermore, the payable days remain manageable at ~6 days (Aug-22: ~11 days) as Company procures paddy on cash. The Company has a moderate borrowing cushion. Going forward, the Company plans to further expand its footing in the export market. thus, the working capital cycle is expected to inflate.

Coverages Interest cover is a function of free cash flows and finance costs. Free cash flows improved to ~PKR 505mln as of Aug-23 (Aug-22: ~PKR 432mln) supported by better profits. While finance costs increased and stood at ~PKR 246mln as of Aug-23 (Aug-22: ~PKR 211mln) due to increased interest rates. This led the interest cover to remain stable (Aug-23: 2.1x, Aug-22: 2.1x). Total and core coverage increased as of Aug-23 to 2.1x (Aug-22: 1.0x). In the inclining interest rate scenario, coverages are expected to become stretched.

Capitalization The Company's business model is designed around securing short-term borrowings to fuel working capital needs. Total debt of the Company clocked in at ~PKR 1,382mln as of Aug-23 (Aug-22: ~PKR 1,121mln). Out of this, ~PKR 1,032mln (Aug-22: PKR 649mln) is short-term debt. While ~PKR 350mln (Aug-22: ~PKR 238mln) is long-term in nature and was obtained for CAPEX. The Company's equity base stood at ~PKR 1,045mln (Aug-22: ~PKR 962mln). This decreased the Company's leverage ratio to ~57% as of Aug-23 (Aug-22: ~54%). Going forward, the leverage ratio is expected to inflate.

### Credit Rating

Credit rating reflects forward-looking opinion on credit worthiness of underlying entity or instrument; more specifically it covers relative ability to honor financial obligations. The primary factor being captured on the rating scale is relative likelihood of default.

	Long-term Rating
Scale	Definition
AAA	<b>Highest credit quality.</b> Lowest expectation of credit risk. Indicate exceptionally strong capacity for timely payment of financial commitments
AA+	
AA	Very high credit quality. Very low expectation of credit risk. Indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.
AA-	
<b>A</b> +	
A	<b>High credit quality.</b> Low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be vulnerable to changes in circumstances or in economic conditions.
<b>A</b> -	
BBB+	
BBB	Good credit quality. Currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity.
BBB-	
BB+	Moderate risk. Possibility of credit risk developing. There is a possibility of credit risk
вв	developing, particularly as a result of adverse economic or business changes over time; however, business or financial alternatives may be available to allow financial commitments to be met.
BB-	
$\mathbf{B}$ +	
В	<b>High credit risk.</b> A limited margin of safety remains against credit risk. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.
B-	
CCC	Very high credit risk. Substantial credit risk "CCC" Default is a real possibility.
CC C	Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. "CC" Rating indicates that default of some kind appears probable. "C" Ratings signal imminent default.
D	Obligations are currently in default.

	Short-term Rating		
Scale	Definition

Outlook (Stable, Positive, Negative, Developing) Indicates the potential and direction of a rating over the intermediate term in response to trends in economic and/or fundamental business/financial conditions. It is not necessarily a precursor to a rating change. 'Stable' outlook means a rating is not likely to change. 'Positive' means it may be raised. 'Negative' means it may be lowered. Where the trends have conflicting elements, the outlook may be described as 'Developing'.

Rating Watch Alerts to the possibility of a rating change subsequent to, or, in anticipation of some material identifiable event with indeterminable rating implications. But it does not mean that a rating change is inevitable. A watch should be resolved within foreseeable future, but may continue if underlying circumstances are not settled. Rating watch may accompany rating outlook of the respective opinion.

Suspension It is not possible to update an opinion due to lack of requisite information. Opinion should be resumed in foreseeable future. However, if this does not happen within six (6) months, the rating should be considered withdrawn.

Withdrawn A rating is withdrawn on a) termination of rating mandate, b) the debt instrument is redeemed, c) the rating remains suspended for six months, d) the entity/issuer defaults., or/and e) PACRA finds it impractical to surveill the opinion due to lack of requisite information.

Harmonization A change in rating due to revision in applicable methodology or underlying scale.

Surveillance. Surveillance on a publicly disseminated rating opinion is carried out on an ongoing basis till it is formally suspended or withdrawn. A comprehensive surveillance of rating opinion is carried out at least once every six months. However, a rating opinion may be reviewed in the intervening period if it is necessitated by any material happening.
