Rating Rationale and Key Rating Drivers

Trust Securities & Brokerage Limited (“TSBL” or “the Company”) is a public listed company primarily providing the services of equity brokerage to HNWI and corporates/institutional clients, with an additional presence in commodity brokerage. The rating incorporates the business acumen of the primary sponsor, experienced management team, and the availability of a client services platform with research reports available to customers. The governance framework is considered strong. The Company has a well-developed organizational structure to manage its operations. The assigned rating also takes into account sound internal controls, primarily attributed to the presence of a dedicated risk management department within the Company, with adequately documented and disseminated internal policies. Moreover, TSBL has opted to outsource its internal audit department, which strengthens the Company's control framework. The Company has established rigorous protocols regarding risk assessment by implementing KYC, CDD, AML, CFT, and whistleblowing Policies. The transition of auditors from category ‘B’ to SBP’s approved ‘A’ category list has significantly enhanced oversight. The IT infrastructure allows full integration of the front and back-office functions, allowing the generation of real-time reports. The market risk is minimal due to the Company’s limited investment in equity securities amounting to ~PKR 27mln. The average market share of TSBL during 9MFY23 stands at ~2%. The brokerage revenue of TSBL declined by 29% during 9MFY23 compared with 9MFY22 whereas market volumes declined by 33% during the same period, indicating that TSBL performed in line with the market. The Company reported a PAT of ~PKR 22mln when compared to the net loss of ~PKR 14mln during SPLY. This improvement can be attributed primarily to a reduction in operating expenses as well as an increase in other income. The Company has a low-leveraged capital structure. The Company has an adequate equity base of ~PKR 312mln at end-Mar’23 (SPLY: ~PKR 289mln).

Going forward, the ratings are dependent on the management's ability to increase and retain its market share and diversification in revenue base to improve its competitive position in the brokerage industry. Simultaneously, it is imperative to uphold robust internal controls, retention of key management personnel, and diligently monitor risks.

Business Sustainability

Business Risk The brokerage industry faced significant challenges during FY23 due to elevated political uncertainty and soaring inflation, which adversely impacted the country's economic landscape. As a result, market activities were subdued, with investors favoring the security of fixed returns from the higher interest rates prevalent in the economy. However, as FY24 commenced, there emerged a recovery in investor confidence. This can be attributed to the resumption of the IMF program and recent government initiatives aimed at tackling persistent economic issues, including addressing circular debt. Despite these positive trends, the political situation in the country remains unstable, leading many investors to adopt a cautious stance until the conclusion of the elections.

Business Profile The Company's Head Office is situated in Karachi and currently has 4 branches dedicated to equity brokerage, with 2 of them situated in Lahore. Additionally, there are 2 more branches focused on Commodities Brokerage located in Karachi. The Company's core product portfolio centers around equity brokerage services, with an additional presence in commodity brokerage. TSBL is categorized as "Trading and Self-Clearing".

Notably, out of this, ~PKR 85m corresponds to income from equity brokerage while ~PKR 26m originates from commodity brokerage. The decrease in revenue and subsequent reduction in profitability is mainly due to a decrease in market volumes during FY23. However, it's worth considering that diversification of revenue streams could potentially yield favorable outcomes for the company's trajectory moving forward. TSBL reported a net profit of ~PKR 22m in 9MFY23 compared to a net loss of ~PKR 14m in SPLY.
